Deer Skin:

Ourstucco Fauxfinish Paint® Bamboo Carbon is a tintable, water-based acrylic paint. The range is available in a tinted primer, artpaint midcoat and paint topcoat. Applied in a sequence of tinted primer, midcoat and paint topcoat, it produces a unique porcelain paint effect, giving the finished surface a different metallic paint and coloured finish. While traditional paint paints are applied by spraying, OURSTUCCO Bamboo Carbon: products can be applied with a roller to produce an even paint effect. Ideal for furniture, feature walls and light-filled ceilings and recesses.

Application

Stir well before use. Use at temperatures between 50° F and 90° F. Product may be applied with roller or spray equipment. After priming with the tinted primer, roll on the clear midcoat, and the crackle topcoat may be used as is or tinted to other colors. It may be thinned up to 30% with water if desired.

Tinting

Can be tinted with water-based or universal colorants (CCA) up to 10% by volume. Use of high quality pigments maintains maximum color reproduction. OURSTUCCO offers 2000 specific color formulations to U.S. retailers made with our 3 basecoats and CCA colorants. (See dealer for details).
