AUSTRIAN TENCEL

Austrian Tencel (same quality as US Tencel): Made with premium German Merck pearlescent pigments, our eco-friendly pearlescent material utilizes edible mica and titanium dioxide coating technology. It boasts a natural, soft luster, diverse colors, unique patterns, and extremely low VOC content, surpassing the environmental ratings of most traditional water-based paints. It boasts high fire resistance, moisture and mildew resistance, exceptional hardness, vibrant colors, high saturation, strong UV resistance, and long-lasting colorfastness. It also boasts a silky, smooth, and glossy finish, imbued with a royal elegance.

Product Ingredients: The main paint components are water, additives, mica powder, and acrylic resin.

Product Features: OURSTUCCO's Austrian Tencel offers a stable coating, strong adhesion, a unique gloss and pattern, and an exceptionally smooth feel, making it suitable for interior and architectural applications of all styles.

Product Care: To ensure product durability and longevity, a topcoat can be applied, but this may alter the feel and gloss of the Tencel.

Product Packaging: Standard packaging in US gallon plastic drums (5 kg/gallon). Instructions: Use immediately after opening the container. Keep the lid closed until the contents are fully used.

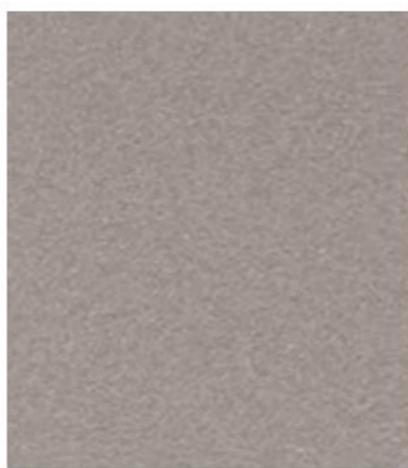

Storage: Tencel products have a shelf life of 3 years if unopened

Austrian Tencel:

Ourstucco Fauxfinish Paint® Austrian Tencel is a tintable, water-based acrylic paint. The range is available in a tinted primer, art paint midcoat and paint topcoat. Applied in a sequence of tinted primer, midcoat and paint topcoat, it produces a unique porcelain paint effect, giving the finished surface a different metallic paint and coloured finish. While traditional paint paints are applied by spraying, OURSTUCCO Austrian Tencel products can be applied with a roller to produce an even paint effect. Ideal for furniture, feature walls and light-filled ceilings and recesses.

Application

Stir well before use. Use at temperatures between 50° F and 90° F. Product may be applied with roller or spray equipment. After priming with the tinted primer, roll on the clear midcoat, and the crackle topcoat may be used as is or tinted to other colors. It may be thinned up to 30% with water if desired.

Tinting

Can be tinted with water-based or universal colorants (CCA) up to 10% by volume. Use of high quality pigments maintains maximum color reproduction. OURSTUCCO offers 2000 specific color formulations to U.S. retailers made with our 3 basecoats and CCA colorants. (See dealer for details).

Note: Ourstucco strongly recommends that specifiers require applicators to prepare samples in accordance with PDCA P5-94, "Benchmark Sample Procedures for Paint and Other Decorative Coating Systems."

Packaging: lamb paint are available in 3.78 liter and 10 liter product packs and Ourstucco color series are available in 0.15 liter experience packs. Stability: Approximately 3 years. Differences in monitor calibration can affect the on-screen appearance of our actual paint and stain colors. Your local Ourstucco paint and stain retailer can match and/or order the exact color you need using the Ourstucco paint or stain color name or number.
