LAMB SKIN

Product Introduction:

This sheepskin-textured paint utilizes a North American-derived formula, German BASF emulsion, natural quartz powder, and mica. Our products are available in three series: Eggshell Lambskin, Matte Brushed Lambskin, and Diamond Lambskin. Each offers exceptionally long-lasting wall coverings. With an extremely low VOC content, it surpasses the environmental standards of traditional paints. It also boasts high fire resistance, moisture and mildew resistance, exceptional hardness, and vibrant, fade-resistant colors. It also offers the same easy application as latex paint and a wide selection of colors. After rolling on a professional primer, simply roll on two coats, eliminating the need for a topcoat.

Product Components: The main paint ingredients are water, additives, mica powder, quartz powder, and acrylic resin.

Product Features: Ourstucco's lambskin series offers excellent sculpting and shaping properties. Simply roll on and create your own look, with self-leveling properties, eliminating the need for sanding. Excellent defoaming properties, no craters or air holes when roller-coated on large walls, resulting in a full, full-bodied paint film, ensuring excellent stain and scrub resistance.

Packaging: Standard 6 kg/US gallon plastic drum. **Instructions:** Open the drum and stir gently before use. Keep the lid closed until fully used.

Storage: Lambskin products have a shelf life of 3 years when unopened.

Lamb Skin:

Ourstucco Fauxfinish Paint® Lamb Skin: is a tintable, water-based acrylic paint. The range is available in a tinted primer, artpaint midcoat and paint topcoat. Applied in a sequence of tinted primer, midcoat and paint topcoat, it produces a unique porcelain paint effect, giving the finished surface a different metallic paint and coloured finish. While traditional paint paints are applied by spraying, OURSTUCCO Lamb Skin: products can be applied with a roller to produce an even paint effect. Ideal for furniture, feature walls and light-filled ceilings and recesses.

Application

Stir well before use. Use at temperatures between 50° F and 90° F. Product may be applied with roller or spray equipment. After priming with the tinted primer, roll on the clear midcoat, and the crackle topcoat may be used as is or tinted to other colors. It may be thinned up to 30% with water if desired.

Tinting

Can be tinted with water-based or universal colorants (CCA) up to 10% by volume. Use of high quality pigments maintains maximum color reproduction. OURSTUCCO offers 2000 specific color formulations to U.S. retailers made with our 3 basecoats and CCA colorants. (See dealer for details).

Note: Ourstucco strongly recommends that specifiers require applicators to prepare samples in accordance with PDCA P5-94, "Benchmark Sample Procedures for Paint and Other Decorative Coating Systems."

Packaging: lamb paint are available in 3.78 liter and 10 liter product packs and Ourstucco color series are available in 0.15 liter experience packs. Stability: Approximately 3 years. Differences in monitor calibration can affect the on-screen appearance of our actual paint and stain colors. Your local Ourstucco paint and stain retailer can match and/or order the exact color you need using the Ourstucco paint or stain color name or number.
